

AIRMEDIA  
— creative services —

## WHAT IS AIR MEDIA?

Air Media have been producing radio imaging elements since 2005. We have a wide range of imaging effects, production work parts, radio beds, news jingles, traffic and weather beds, sports themes and seasonal effects including Christmas and Halloween. We also have a bespoke voice over service ideal for radio sweepers and promos for podcasters and radio imaging.

Why not try our free package containing over 150 files ready for you to download, with no need to sign up. There is a small sample of each category, with a few jingles in there too.

All our files are available as an instant download, royalty free and ready for you to use within your radio imaging and productions.

**“ Every product on the Air Media website in one great package - with an additional USB ”**

We have two versions of our radio imaging library. For £170 you get every product on the website including over 85 packages and 4,700 files. And for only an extra £30 you can also get a USB with all these packages, plus an additional 30 plus packages (including over 700 files) which are not available on the website. This will be posted to you anywhere around the world for free - you also get an instant download of the content.

Or if you simply just want to have all of the radio imaging effects Air Media has to offer in 1 package, why not try this. For £80 you can get over 35 packages with over 2,000 imaging effects for radio and audio production, to help you create your own radio station imaging.
